

1 make-up 11 applied part way across the lashbed 12 of the eye 10
2 by the brush 1 of the present invention. Specifically, Figure 5
3 demonstrates the "position and wiggle" application of make-up 11
4 to the lashbed 12. Also, in an alternative embodiment the
5 cosmetic may be applied along the lower lashbed 13 of the eye
6 although this may not be desirable.--
